[[(c)] (d) if the text in the page image is determined to be legible, then displaying the page image, otherwise obtaining and displaying a new image of the page obtained at a resolution higher than the base resolution.

19. (Currently amended) The method of Claim 17, wherein ~~determining the legibility~~ obtaining the measure of text in the page image includes[[: (a)]] performing text recognition on text in the page image ~~and producing a measure of the text;~~

24. (Currently amended) A multistage method for automated determination of legibility of text in an image of a page, comprising:

- (a) obtaining an image of a page having text therein;
- (b) determining the legibility of the text by applying a first test of legibility to the text in the page image, wherein the first test of legibility includes obtaining a measure of the text in the page image and comparing the measure of the text with a measure of the page image itself;

(c) determining the legibility of the text by applying a second test of legibility to the text in the page image; and

(d) storing the page image for display if the text in the page image is determined to be legible.
